

# MOHD SAIF

Software Engineer | Full Stack Developer (MERN) | AI/LLM & RAG

Bareilly, Uttar Pradesh | +91 9027370778 | [saifofficial0778@gmail.com](mailto:saifofficial0778@gmail.com) | GitHub: [github.com/saifofficial0778-svg](https://github.com/saifofficial0778-svg) | LinkedIn: [linkedin.com/in/mohdsaif-svg](https://linkedin.com/in/mohdsaif-svg) | LeetCode: [leetcode.com/u/MOSAIF1](https://leetcode.com/u/MOSAIF1)

## PROFESSIONAL SUMMARY

MCA candidate and Full Stack Developer (MERN) with hands-on experience architecting scalable web applications and robust backend systems, including RESTful APIs, authentication, and role-based access control. Currently developing expertise in AI/LLMs and Retrieval-Augmented Generation (RAG) to build intelligent, production-oriented applications. Strong analytical foundation in Data Structures & Algorithms and a commitment to writing maintainable, well-structured code.

## TECHNICAL SKILLS

- Languages: JavaScript (ES6+), Python, Java, C
- Frontend: React.js, HTML5, Tailwind CSS
- Backend: Node.js, Express.js, RESTful API Design
- Databases: MySQL, MongoDB
- Security & Auth: JWT, Role-Based Access Control (RBAC)
- AI/ML: LLM Fundamentals, Prompt Engineering, Retrieval-Augmented Generation (RAG) - Learning
- Tools & Deployment: Git, GitHub, Postman, Cloudinary, MySQL Workbench, VS Code, Vercel, Netlify, Railway
- CS Fundamentals: Data Structures & Algorithms (DSA - 80+ solved), OOP, DBMS, Computer Networks (CN), Operating Systems (OS)

## EXPERIENCE & PROJECTS

### SRMS Connect - Alumni & Student Networking Platform | MERN Stack, MySQL, JWT

- Architected a private, verified networking platform connecting students and alumni for 1:1 mentorship, career guidance, and job/referral postings, built on a layered MySQL schema (Identity, Authentication, Application layers).
- Built the complete authentication module from scratch - signup, login, logout, forgot-password, and reset-password flows - with secure password hashing (bcryptjs), JWT-based session authentication, and Zod schema validation.
- Implemented role-based access control (RBAC) for Student/Alumni/Admin roles, brute-force protection via failed-login tracking and account lockout, and CSV-based bulk import for college enrollment data.
- Structured the backend using a modular Controller-Service-Repository architecture and integrated Cloudinary for image/media handling.

### School ERP System (SaaS) | MERN Stack, MySQL

- Building a multi-tenant School ERP SaaS platform with scalable, modular architecture to manage academic and administrative workflows across multiple schools.
- Developed Academic Year, School, Class, Student, and Teacher management modules with JWT-based authentication, RBAC across admin/teacher/student roles, and request rate limiting on key API endpoints.
- Engineered a transaction-safe fee payment system across 30+ RESTful APIs and MySQL schemas - auto-generating student fee accounts and installments, updating payment/account status, and producing receipts via ACID-compliant database transactions.

### AI Resume Parser & Screening Tool | Python, Groq LLM API, Pydantic

- Built a tool that uses an LLM (Groq-hosted gpt-oss-120b) to read a job description and a batch of resumes (PDF/DOCX) and convert both into clean, structured data using Pydantic schemas.
- Automated candidate-to-job matching by scoring each resume against the parsed job requirements, surfacing matching skills, missing skills, and an overall fit percentage with a short verdict.
- Ranked all candidates by score to auto-shortlist the top matches; preparing to deploy it as a web app for practical, real-world use.

## EDUCATION

Master of Computer Applications (MCA) - SRMS College, Bareilly | Expected 2027

Bachelor of Science (B.Sc.) - MJPRU University | 2024

## ACHIEVEMENTS & CERTIFICATES

- Solved 80+ Data Structures & Algorithms (DSA) problems and earned the 50+ Day LeetCode Badge (2026) for consistent daily problem-solving.
- Oracle Certified Foundations Associate - Agentic AI (Oracle University, Aug 2026).
