

# ARJUN SHARMA

arjun.sharma.dev@example.com | +91-98XXXXXX21 | LinkedIn: linkedin.com/in/arjunsharma-dev | GitHub: github.com/arjunsharma

## PROFESSIONAL SUMMARY

Software / Cloud & DevOps Engineer with 3+ years of experience building scalable backend services, cloud-native applications, CI/CD pipelines, and production infrastructure. Strong in Python, Java, Node.js, REST APIs, Docker, Kubernetes, AWS, Terraform, Linux, GitHub Actions, observability, SQL/NoSQL, and system design. Experienced in automating deployments, improving reliability, and collaborating across development and operations.

## TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Bash, SQL | Backend: Node.js, Express, Spring Boot, REST, Microservices | Cloud: AWS (EC2, S3, RDS, VPC, IAM, Lambda, CloudWatch), Azure fundamentals | DevOps: Docker, Kubernetes, Helm, Terraform, GitHub Actions, Jenkins, Argo CD, CI/CD | Databases: PostgreSQL, MySQL, Redis, MongoDB | Infra/OS: Linux, Nginx, Networking, Git | Observability: Prometheus, Grafana, ELK | Practices: Agile, code review, testing, security, system design

## EXPERIENCE

### Software Engineer / Cloud & DevOps Engineer — TechNova Solutions | 2023–Present

- Designed and maintained REST/microservice APIs serving 1M+ requests/day using Node.js and Python.
- Containerized services with Docker and deployed workloads to Kubernetes on AWS EKS.
- Built CI/CD pipelines with GitHub Actions/Jenkins, reducing deployment time by 65% and enabling automated tests, security scans, and rollback.
- Provisioned repeatable AWS infrastructure with Terraform across VPC, EC2, RDS, S3, IAM, and CloudWatch.
- Implemented Prometheus/Grafana monitoring and centralized logging, reducing mean time to detect production issues by 40%.
- Optimized PostgreSQL queries/indexes and Redis caching, improving API p95 latency by 35%.

### Backend Developer — CloudWorks Pvt. Ltd. | 2021–2023

- Built Java/Spring Boot and Node.js services with REST APIs, authentication, validation, and automated tests.
- Migrated legacy deployment workflows to Docker-based environments and introduced Git-based release practices.
- Worked with MySQL, PostgreSQL, MongoDB, Redis, Linux, Nginx, and AWS services.
- Collaborated with frontend, QA, and infrastructure teams in Agile sprints.

## PROJECTS

### Cloud-Native E-Commerce Platform — AWS EKS, Docker, Kubernetes, Terraform, Node.js, PostgreSQL, Redis

Microservices architecture with autoscaling, health checks, rolling deployments, Terraform infrastructure, CI/CD, caching, monitoring, and centralized logging.

### DevOps Delivery Platform — GitHub Actions, Docker, Kubernetes, Helm, Argo CD, Prometheus, Grafana

Automated build-test-scan-deploy workflow with GitOps releases, deployment history, rollback, service dashboards, and alerting.

## EDUCATION

B.Tech. in Computer Science — ABC Institute of Technology | 2021
